

# HEAT KING

## HK300DS Drill Shack Heater

With over 20 years of experience in the development and production of heating equipment and thousands of systems delivered, Heat King is proud to introduce the HK300DS. Designed to be used in remote locations for heating drill shacks. With this you will achieve fuel savings in excess of 50% compared to an indirect fired diesel heater of similar capacity.

### FEATURES

- Simple User Friendly Controls
- Rugged Construction
- Quiet Operation
- 750 Hour Service Intervals
- Wall Mount Heaters
- Large Washable Air Filters
- Thermostatically Controlled Fans
- Low Fuel Consumption
- Environmentally Friendly Heat Transfer Fluid

### SPECIFICATIONS

- |                        |                 |
|------------------------|-----------------|
| • Net heat input       | 300,000 Btu/h   |
| • Burner               | Wayne Msr-la    |
| • Fuel Type            | Diesel          |
| • Fuel Consumption     | 1.8 GPH Max     |
| • Fuel Supply/Return   | 3/8"/1/4" Barb  |
| • Glycol Tank          | 90 US GAL       |
| • Glycol Tank Pressure | Atmospheric     |
| • Field Loop Pressure  | Up To 35 psi    |
| • Power Requirement    | 120Vac/60Hz 30A |
| • Weight               | 620 lbs         |
| • L x W x H            | 60" x 36" x 38" |

## User Friendly Controls

The control panel features large, easy to use switches, digital suppl/return temperature display and LED warning lights for ease of troubleshooting

## Long Run Time

The HK300DS features 750 hour service intervals and is easy to access all service components.

## High Efficiency Heaters

The HK300DS comes with 3 high efficient unit heaters that feature dual high pressure centrifugal fans that are thermostatically controlled to maintain a comfortable temperature and allow for fuel savings.
